Personal Profile

I am currently a master's student at Northumbria University looking to progress in software development.

ASD allows me to be hyper focussed on a goal and strive for the best outcome. I really enjoy trying new technologies and pushing their limits. I am friendly, open, and non-judgemental and always try to solve issues diplomatically. I would like to consider myself very approachable. I am very methodical towards problems and have strong critical thinking skills.

Experience

Social Media and Technology Consultant • Be: Trans and NB • Current
I currently assist a local charity that specialises in supporting Transgender-identifying people in the Northeast. This includes managing their media engagement platform, website, and email systems.

Assistant Scout Leader • The Scouting Association • 2014 – 2021

I have been through the scout system and was leading my own troop as a Leader. This has been invaluable to my skills including Leadership, First-Aid and working in a team.

Assistant Vehicle Examiner • DVSA • 2016 – 2016
While working with the team, I introduced more efficient procedures using technology instead of their currently implemented paper-based methods, revamping their workflow.

Training Employee • COBALT-ICT • 2014 – 2014
I was given an opportunity where I was able to work on hardware and software for the company's clients, this also pushed me towards working for a CompTIA A+ Certification.

Education

MSC ADVANCED COMPUTER SCIENCE • CURRENT • NORTHUMBRIA UNIVERSITY
Predicted Grade: Distinction

BSC COMPUTER SCIENCE • 2022 • NORTHUMBRIA UNIVERSITY
Grade: First Class Honours

EXT. DIPLOMA IN GAMES DEVELOPMENT • 2019 • NEWCASTLE COLLEGE
Grade: Distinction *, Distinction *, Distinction *
